Why Metro Park?

Our most widely used solution is a first-of-its-kind designed to alleviate the stress of parking management within the city. Our innovative software is secure, cloud-based, mobile-ready, easy to use for both property managers and residents.

Customer Benefits

- Multiple payment channels.
- Extend/Stop parking sessions from anywhere.
- Optional text reminders.
- Receipts, for expense claims.
- Automatic account top-up.

City and municipality benefits

- Real time revenue distribution.
- Accounting for all stockholders based on pre-defined distributions.
- No significant overhead cost.
- Agent devices that record and manage violations and penalties.
- Eliminates cash collection by agents.
- Flexible solution to congestion.
- Timers allow or restrict parking at specific hours of the day based on traffic intensity.
- Indirect and supplementary revenue from non-parking economic activities.

Benefits

Independent parking facilities benefits

- The City Council becomes a service provider for independent parking facilities.

- Customers use the same stress-free system to pay for parking e.g. at airports or private lots with space to rent.

A verification system that ensures only authorized residents are issued parking permits.

- Which allows you to quickly navigate our system from anywhere.

- Full Transparency and protection with detailed violation reports that include photos, time-stamps, and written descriptions.

- Effortless guest vehicle registration managed directly by residents online.

- Convenient mobile applications via the Android Play Store and Apple iTunes Store.

- Unlimited user accounts for board members, property management staff, and community members.

- An integrated payment gateway for residents to purchase parking permits online.
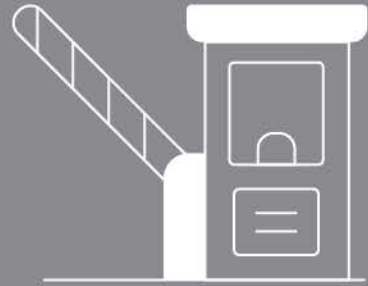

Management and Enforcement

Parking management system comprises of traveler information systems, real-time vehicle counting, real-time parking guidance display, video surveillance, and easy payment options. Our advanced parking management system allows users to reserve and pay for a parking space via telephone or the internet.

• Uses ANPR Technology.
• Automatic verification of vehicle status in database.
• Digital generation of infraction ticket.

• Based on predefined rules, the system triggers requests for either booting or towing.
• Continuous reminder of actions for agents.
• System generates white lists in particular streets
